

Physiotherapy for Industrial Workers: Workplace Wellness

School of Physiotherapy, RK. University has been continuously working for providing quality health care services to society. It has been observed that industrial heavy workers are prone to minor to major injuries which is responsible for their

compromised physical performance, quality of work that affects production of the industries. To provide preventive measures and promote workplace wellness for industrial workers, an industrial visit was conducted on 25/3/2014 at Chirag Foundry, Aji Dam Industrial Area by Dr.Moushumi Debnath, AP, SOPT,RKU and students. Students assessed physical health on every workers and basic treatment was given. Moreover, a presentation and counseling with ergonomic advises to deal with their individual occupational hazards and improving quality of care & life. .
